REMARKS

RETURN TO CIA
LIBRARY

1. On 17 November 1951, source determined that the complex under construction north of the Soviet signal equipment depot employed about 100 German workers and was scheduled for completion by 21 December. The construction of the new depot was supervised by Lieutenant Colonel Zakherov (fnu) who used to ride sedan . The old depot contained signal equipment, including cable reels, batteries and radio cars on blocks, and several trucks

2. Another depot situated about 1 km north of the signal depot and west of the road was also being enlarged. About 500 workers were employed. Upon completion, the Soviet installation there will be moved to the enlarged depot east of the road, while the German Volkspolizei, on whose authority the enlargement was made, will occupy the installation west of the road. The drawings of both construction sites had to be handed over to VP Inspektur Wirkner (fnu) every evening.

3. On 27 October, five railroad carloads of material for the unit were unloaded at Pieskow railroad station and the cargo hauled away

4. A fuel dump was under construction near the castle at Schammetzel Lake, south of Pieskow railroad station.

Comments.

- (1) Information on the enlargement of the signal equipment depot of the GORU in Bad Saarow was first reported in . Upon completion of the work, the branch depot, which is still housed in Depot Aktion Brand about 1 km north of the main depot west of the Bad Saarow-Deeskow road, will probably be dissolved and moved to the main depot. Lieutenant Colonel Zakherov (fnu) is reported for the first time. The trucks belong to the GORU. For sketch of depot, see Annex.
- (2) The depot is referred to as Depot Aktion Brand. According to a previous report, a VP hospital and recreation center were to be established there.
